

COMPOSITION

A combination of anionic surfactants and alkyl sulphonates.

IONIC STRUCTURE

Anionic

APPEARANCE

Light yellowish, viscous liquid.
pH(%5) : 7,2 - 7,8

PROPERTIES

MEGDER 21 YY is especially formulated for wool washing.

Is very effective in prevention of felting of wool in double face production. Provides a very good whitening effect by decreasing the friction and intermingling of the wool fibres.

Removes the dirt from the wool fibres and prevents their precipitation on the fibres again.

When it is used in fatliquoring mixtures during garment nappa and double face production, improves the emulsion properties.

In this way, the distribution of natural fats is improved and the skins gain better tensile resistance.

APPLICATION

| | |
|----------------|----------|
| Washing : | % 1 - 2 |
| Degreasing : | %0,5 - 1 |
| Fatliquoring : | % 1 - 3 |

STORAGE

Keep well closed, in its original container, free from moisture. .

PACKING

60 kg plastic drum and 200 kg barrel.
