

COMPOSITION	A mixture of polymeric fixing agents.
IONIC STRUCTURE	Cationic
APPEARANCE	Colorless liquid pH(%10) : 4.5 +/- 0.5
PROPERTIES	It is a mixture of cationic polymer substances. Provides good fixing properties for anionic dyes. Helps with better exhaustion of dyes in the bath. Cross-sectional distribution of dyes is more uniform as it supplies controlled fixation. MEGDER F 40 is especially used for uniform, vivid and lively wool dyeing in double face production.
APPLICATION	Use 1 / 2 or 2 / 3 of the formic acid for the fixation and complete the operation 15-20 minutes later with MEGDER F 40 So, the fixation is completed in 20 – 30 minutes.
STORAGE	Should be kept closed in its original container under normal storage conditions.
PACKING	60 kg plastic drum..
