

COMPOSITION	An inert silicone emulsion.
APPEARANCE	Creamy white liquid pH : 7 - 8
PROPERTIES	MEGDER SKK is a universal defoaming agent. Is miscible with water in all ratios. Ensures a rapid defoaming.
APPLICATION	Used in various industries, especially leather, as defoamer and antifoam agent. It is recommended to add it in a separate medium to all baths where defoaming is required. Predilution should be done by adding water in a ratio 1 / 10 – 1 / 15.
STORAGE	Should be kept closed in its original container under normal storage conditions.
PACKING	60 kg plastic drum.
