

COMPOSITION

Mixture of biodegradable special emulsifiers

IONIC STRUCTURE

Anionic-Nonionic

APPEARANCE

Light-yellow, viscous liquid.

PROPERTIES

MEGDER SUTAN is an ecologically formulated, highly-concentrated degreasing agent.

Shows a high performance in emulsifying the natural grease of leather and washing the dirt and hair.

Does not contain any solvent.

Can be used in order:

- To level a small quantity of grease in calf skin and cowhides
- To remove natural grease in sheep skins
- In wetting - washing stages of sheep skins
- To remove chrome foam from the surface

But, its most important property is its high performance in wetting, degreasing and wool washing of double-face applications.

APPLICATION

The following usage quantities are recommended:

In levelling of natural grease in calf skin

and cowhides :	1 – 2 %
In wetting of sheep skin for garment :	0.2 – 0.5 %
In degreasing at depickling stage :	3 – 7 %
In waterless heated drum :	3 – 8 %
In wetting stage of double – face production :	0.2 – 1.0 g / l
In degreasing (Total in two baths) :	4 – 10 g / l

STORAGE

It should be stored under normal conditions, in its original closed container.

PACKING

60 kg and 120 kg plastic drum.
