

COMPOSITION

A combination of etoxylated fatty alcohols' concentrate.

IONIC STRUCTURE

Nonionic

APPEARANCE

Colourless, transparent viscous liquid.
pH : 5,5 - 7

PROPERTIES

MEGDER WET is a universal washing and wetting agent. Is compatible with alkalines, electrolytes and hard water. Has excellent soaking properties due to its high etoxylation number.

It should be used its effectiveness during the wetting process. Since it partly emulsifies the natural fat of the skin, it is recommended to use it during the deliming process, thus facilitating the next step of degreasing.

MEGDER WET is an ideal emulsifier in solvent-based degreasing process.

APPLICATION

In wetting baths:	
Double – face :	0.5 - 1 g/l
Sheep and cattle skin :	1 – 1.5 %
Deliming :	0.5 – 1 %
Solvent-based degreasing bath :	2 – 4 %

STORAGE

Keep well closed, in its original container, free from moisture. .

PACKING

60 kg plastic drum and 200 kg barrel.
