

### COMPOSITION

It is a degreasing and rust removing agent with special additives that clean the metal surface from dirt and rust.

### APPEARANCE

Clear, colorless liquid.  
pH : 1,45- 2,5  
Working Concentration : % 2 - 5

### PROPERTIES

It contains special corrosion inhibitors and rust removing additives. Therefore, it cleans the rust from iron and steel material.

After cleaning the rust from the surface, it forms a thin phosphate film on the surface which protects the metal surface.

It does not damage the metal surface.

### APPLICATION

It is recommended to use by dipping method or spraying.  
The metal should be treated approximately for 3 – 4 minutes.

### STORAGE

Storage life in its original closed package and under normal conditions is 1 year.

### PACKING

50 kg. or 200 kg plastic containers.
