

COMPOSITION

A combination of organic acids.

IONIC TYPE

Anionic

APPEARANCE

Colorless clear liquid

PROPERTIES

It is very effective complexing agent, which prevents the formation of precipitations due to water hardness and heat in wet mediums.

Acts as a corrosion inhibitor.

Makes complex for heavy metal and metal ions according to the pH and temperature.

Can be used safely in bleaching and dyeing processes.

Provides a perfect whiteness and better hydrophilicity by complexing earth alkaline and metal ions.

Are obtained.

Can be used as a cleaning and regeneration agent in ion exchanger resins.

It is also good dispersing agent.

APPLICATION

In the bleaching process of cotton products;

Pad-Batch	1.0-2.0 g/l
Pad-Roll	2.0-3.0 g/l
Pad-Steam	1.0-2.0 g/l
Exhaustion	0.2-0.3 %
In dyeing baht (per each German hardness)	0.35 g/l

PACKING

60 kg plastic drum and 200 kg barrel.

STORAGE

In its original container and at room temperature is 1 year.
