

**COMPOSITION**

A combination of organic acids.

**IONIC TYPE**

Anionic

**APPEARANCE**

Colorless clear liquid

**PROPERTIES**

It is very effective complexing agent, which prevents the formation of precipitations due to water hardness and heat in wet mediums.

Acts as a corrosion inhibitor.

Makes complex for heavy metal and metal ions according to the pH and temperature.

Can be used safely in bleaching and dyeing processes.

Provides a perfect whiteness and better hydrophilicity by complexing earth alkaline and metal ions.

Are obtained.

Can be used as a cleaning and regeneration agent in ion exchanger resins.

It is also good dispersing agent.

**APPLICATION**

In the bleaching process of cotton products;

Pad-Batch	0.5-2.0 g/l
Pad-Roll	1.0-3.0 g/l
Pad-Steam	0.5-2.0 g/l
Exhaustion	0.1-0.3 %
In dyeing baht (per each German hardness)	0.25 g/l

**PACKING**

60 kg plastic drum and 200 kg barrel.

**STORAGE**

In its original container and at room temperature is 1 year.
