

COMPOSITION

Mixture of high molecular weight water-soluble polymers

IONIC TYPE

Nonionic

APPEARANCE

Colorless clear liquid

PROPERTIES

MEGSOL KO 20 is used as an anti-creasing agent in wet-processing like bleaching, dyeing and pre-treatment. Prevents crease formation by forming water cushion on textile fabrics.

Is very effective on fabrics especially lycra, lyocell and their blends with others.

Compatible with bleaching and optical brighteners.

Provides good antistatic properties to fabric as well as a smooth touch.

Dissolves easily in water

APPLICATION

Must be added to the bath at the beginning, before other chemical auxiliaries and dyes.

It is used in 0.5-2.0 % ratio according to the type of fabric and fiber.

PACKING

60 kg plastic drum and 200 kg barrel.

STORAGE

In its original container and at room temperature is 1 year.
