

MEGSOL SUTAN

Solvent-Free Oil and Stain Remover

COMPOSITION

Mixture of surface active agents.

IONIC TYPE

Nonionic-Anionic

APPEARANCE

Yellow paste

PROPERTIES

MEGSOL SUTAN is a perfect washing agent and stain remover used to remove wax and oil particles.
Can be used to detach and wash lubricants deriving from weaving or knitting processes.
Can be used in pre-washing, scouring and bleaching processes of all types of fabrics.
Due to its being solvent-free, protects its property to remove oil and stain particles even at high temperatures.
Does not lose its effect at high temperatures and pH values.
When MEGSOL SUTAN is used for pre-washing of stained fabrics, the dyeing operation may continue without unloading the dyebath.

APPLICATION

It is recommended to use 0,5-2.0 % depending on the stain and dirt level.
It is treated at 40-50°C for 10-15 minutes then the operation temperature is raised at high temperatures. The washing process is kept running for a while and then is ended.

STORAGE

Storage life in its original container and at room temperature is 1 year.

PACKING

60 kg plastic drum, 200 kg barrel and 1 tone container.
