

COMPOSITION

Mixture of nonionic and dispersing agents

IONIC STRUCTURE

Anionic- Nonionic

APPEARANCE

Light yellow fluid

PROPERTIES

MEGSOL YK is a concentrated dispersing agent especially developed to prevent back-staining during stone-wash process of blue jeans.

Serves two purposes during stone-washing:

- Keeps the pH range in neutral zone.
- Prevents back-staining.

Can be used in stone-washing with all kinds of cellulose enzymes (acid, neutral).

APPLICATION

The usage quantity varies in the range 0.5-2.0 g/l depending on the dyebath.

STORAGE

Storage life in its original container and at room temperature is one year.

May become paste because of cold. In case it stays at cold, The product can easily regain its fluidal property by heating. By this process the product doesn't lose its activity.

PACKING

60 kg plastic drum, 200 kg barrel, 1 ton container
