

COMPOSITION

Mixture of special emulsifiers, lubricants, antistatic agents and improving strength agent

IONIC STRUCTURE

Anionic-nonionic

APPEARANCE

White stable milky emulsion.

PROPERTIES

- Optimum lubrication
- Improving the strength of fiber
- Strong antistatic effect
- Prevent to corrosion
- High washability.

APPLICATION

Dipping method after oiling with conning oil (MEGYAG KA 20) or only in rolic.

STORAGE

It must be protected from excessive cold. In case it stays at cold. It should be brought to room temperature and stirred before use. In its original container and at room temperature is 6 month.

PACKING

50 kg plastic drum, 185 kg barrel and 1 tone container.
