

COMPOSITION

Combination of emulsifiers, antistatic agents and lubricants.

IONIC STRUCTURE

Anionic - Nonionic

APPEARANCE

Light yellow, clear, slightly viscous liquid.

PROPERTIES

MEGSOL P 400 C is a lubricant that can be used in production of yarn made from wool, wool mixtures, synthetics and natural fibers.

Does not contain mineral oil.

Has an antistatic, lubricating and softening effect.

It can be removed easily by washing.

Soluble in water in all ratios

Minimize fiber- metal friction.

Prevents breakages and dust flying of fibers.

High efficiency is obtained in drawing process.

APPLICATION

| | |
|-----------------------------|-------------|
| Wool 100% (Kamgarn) : | 0.5 – 1.0 % |
| Wool 100% (Streichgarn : | 2.0 – 3.0 % |
| Viscose – Acrylic : | 0.3– 0.5 % |
| Polyester : | 0.3– 0.5 % |
| Acrylic : | 0.5 – 1.0 % |

STORAGE

It must be protected from excessive cold. In case it stays at cold, it should be brought to room temperature and stirred before use.

In its original container and at room temperature is 1 year.

PACKING

60 kg plastic drum, 200 kg barrel and 1 tone container.
